

# Automatic Speaker Verification and Spoofing Countermeasures Challenge

## ASVspoof 2021 Workshop

<https://www.asvspoof.org/workshop>

### TOPICS

Challenge participants are invited to submit papers to describe their systems and results. We additionally welcome regular papers related (but not limited) to the following topics:

- voice anti-spoofing and presentation attack detection
- speaker recognition, identification, and verification
- generation and detection of text-to-speech, voice conversion and speech deepfakes

### PAPER SUBMISSION

While the usual requirements regarding novelty are more relaxed for challenge system papers, reviewing criteria are independent to challenge results and ranking. For the regular papers, the usual criteria apply. All papers will be peer-reviewed by scientific committee members (see the workshop website).

### WORKSHOP

The ASVspoof 2021 Workshop is an official Interspeech 2021 satellite event which takes place online on September 16, 2021. Participation will be free of charge and open to anyone, not limited to challenge participants. Submitted papers will be subject to blind peer review. Accepted papers will be published in the ISCA online archive, with a DOI assigned to each accepted paper.

### IMPORTANT DATES

Paper submission opens	June 16
Abstract registration deadline	July 16
Paper submission deadline	July 23
Acceptance notification	August 16
Camera ready papers	August 23
Online workshop	September 16
